

BKW

Environmental Ltd

Environmental Health and Safety

Sustainability

Integrity

Accredited

Our team of specialists are on call when required, providing support and advice in all areas of Environmental Health and Safety.

ENVIRONMENTAL COMPLIANCE AUDITS

Our environmental audits give you peace of mind to understand the risks within your sites and a strategic plan to remediate. The risk has to be reduced to a point where it can be deemed to be 'As Low as Reasonably Practicable'.

We have extensive experience of developing and performing Environmental Health and Safety Audits, on a broad range of business processes, management systems and projects, focusing on technical, operational, and organisational aspects, and the interaction between them.

We provide quick, cost effective Phase 1 Desktop Study and Site Investigation services. Our phase 1 reports are designed to meet the needs of planning conditions and can provide an assessment of risks prior to property and land purchase.

BKW Environmental respond to emergencies, provide due diligence for environmental issues, support with land development, planning and managing environmental risk for our clients. We do this through investigation, assessment and remediation and can help you reduce environmental risk and liabilities, while saving money, remaining compliant, maintaining reputation and minimising the risk of operational downtime.

RISK ASSESSMENTS

We have built up extensive experience in the planning, execution, and implementation of quantitative risk analysis (QRA) techniques as a risk management tool. Including specific risk assessments such as:

- Fire
- Noise
- Vibration
- Environmental
- Manual handling
- COSHH assessments
- Display screen equipment
- Risk assessment for COVID-19

CONSULTANCY

Consultancy services specifically designed to support your business, whatever the size, to ensure the Health, Safety and Welfare of every worker.

PROJECT MANAGEMENT

Developing Management Systems that are “fit for purpose”

Making them relevant to the company’s activities, both at a corporate and project level, with the common focus on implementing a management system to industry & international best practises that will naturally gain accreditation to International Standards (ISO14001, ISO9001, OHSAS18001 (ISO45001)).

The provision of Environmental, Health & Safety Services
